

Articlenumber: 000P5P261001
GTIN: 4050369085732
Unit: 1
Weight incl. packaging 0,00 kg
Weight excl. packaging: 0,00 kg

Highlights

IR Laser Protection Film for Reliable Protection Against Stray Light

Our IR laser protection film offers reliable protection for common laser types such as diode lasers, Nd:YAG, Ho:YAG, Er:YAG, and CO₂ lasers. It is specifically designed to protect against stray light in the specified wavelength ranges. Applying the film to both sides further increases the optical density and effectively doubles the level of protection. The laser protection film is suitable for easy self-installation and is available in various fixed dimensions. A squeegee is included with every order for optimal, bubble-free application. Detailed assembly instructions are available for download on our [instructions](#) website.

Standard sizes available:

- 1 linear meter
- 2 linear meters
- 3 linear meters

Should you require different dimensions, we would be happy to provide you with a customized quote.

COLOUR:	blue, transparent
DIMENSION (MM):	Width 1500mm
PROPERTIES:	IR laser protection film
PROTECTION RANGE:	Infrared, ultraviolet
VLT (APPROX.):	42%
