HEINE LoupeLight2 A27LEDLU1000

Articlenumber: A27LEDLU1000
GTIN: 4050369041769
Unit: 1 Stück
Weight incl. packaging 0,00 kg
Weight excl. packaging: 0,00 kg

Highlights

The powerful HEINE LoupeLight 2 is suitable for use with the HEINE HR and HRP binocular loupes. We use the HR binocular loupe in conjunction with the [F27](#) laser safety glasses, which are available with all laser protection filters available for medicine. Optionally, the LED lamp can be folded up independently of the magnifying glass. In combination with the binocular loupe, the HEINE LoupeLight 2 delivers high image quality for precise diagnoses as well as absolutely homogeneous, bright light, optimal color rendering and shadow-free lighting in a clearly defined light cone. The precision lens system is securely protected from dust and dirt in an elegant aluminum jacket
