Highlights

The long lasted and well-tried IPL-goggle F04.P5L19.1001 with a shade 5 shield within the F04 frame is intended to be used only with IPL systems or other high brightness, non-coherent light sources. It has no admission for laser protection. It stands out for its low weight and a comfortable fitting. We recommend the laservision cleaning station for cleaning the laser safety goggles (A99CLSTA1300).
