The laser safety spectacle F20.T2K05.1001 provides a broadband laser safety within the NIR- and IR-spectral range (850-11500nm). The spectacle with convex, coated, light grey filters and formable temples offers a very gut field of view. Through to the light weight it also offers a good wearing comfort. It is shipped in a metal box which can also be used as a storage box. laservision recommends the professional cleaning station (A99.CLSTA.1300) for cleaning the laser safety loupe.
