- Different wearing options

The laservision laser safety goggle R14.T1B09.1004 with a aired foam frame (A) is suitable for alignment applications within the visible laser radiation (400-670nm). It only offers alignment protection. The goggle with grey filters can be worn over large corrective glasses. The changeable click frame with a aired foam (A14AIRE1000) makes the goggles particularly comfortable to wear and prevents fogging of the laser protection filters. A clear view is guaranteed even with a long wearing period. The shipment includes a metal box which can also be used as a storage box. The removable frame can optionally be bought in sets of 5.
