- Unlimited colour view and very high VLT
- · Different wearing options

The laservision laser safety goggle R14.T1K16.1004 with an aired foam frame (A), provides high protection rating within the NIR and IR spectral range (900-11,500nm). The OTG goggle with light grey and coated filters can be worn over average large correction glasses. The changeable click frame with an aired foam (A14AIRED1000) makes the goggles particularly comfortable to wear and prevents fogging of the laser protection filters. A clear view is guaranteed even with a long wearing period. The shipment includes a metal box which can also be used as a storage box. The removable frame can optionally be bought in sets of 5.
