The laservision laser safety goggle R14.T1P01.1004 with an aired foam frame (A), provides a broadband laser protection effect within the UV, VIS, NIR and IR spectral area (180-532nm and 750-1,100 and 9,000-11,500nm). The OTG goggle with brown filters can be worn over average large correction glasses. The changeable click frame with an aired foam (A14AIRED1000) makes the goggles particularly comfortable to wear and prevents fogging of the laser protection filters. A clear view is guaranteed even with a long wearing period. The shipment includes a metal box which can also be used as a storage box. The removable frame can optionally be bought in sets of 5.
