Highlights

The magnetic column TTS.POST1.1002 can be placed freely on the OT by means of a strong neodymium magnet, provided that the OT has a magnetic surface. It has a total height of 309 mm. A maximum of 3 laser protection plates (TTS.M7P06.100x) with a height of 306mm can be held by it, so that there is a large number of assembly options. A plastic cap at the top minimizes the risk of injury.
