### Highlights

The basic module TTS.M7P06.1001 with a standard size of (WxHxD) 200x306x6 mm consists of the proven BARRIER material M7P06. (The dimensions refer to the clear width between the pillars. The real plate is 8 mm wider so that it can be pushed into the pillars.) This is an aluminum sandwich structure with coated aluminum cover plates (color: black). It offers good protection especially in the IR range and is tested and certified according to DIN EN 60825-4.
