

# laservision

A man with a beard and mustache, wearing safety glasses, is the central figure. A bright red laser beam reflects off the right lens of his glasses. The background is a collage of torn, layered paper in various colors including white, yellow, red, and blue. The overall aesthetic is industrial and high-tech.

## Entirety special.

The new F47 is more than laser safety eyewear. It is the fusion of the best characteristics – started with safety and protection, followed by comfort and style up to its functional expansion options.

### What makes the F47 so special:

- Sportive, unique, tight-fitting design
- Filters with basic curve 8
- Frameless filter without viewing restrictions
- Low weight (25g)
- 2-component soft temples
- Adjustable nose piece for an individual fit
- Available in principle with all plastic laser safety filters from laservision

---

## Your Laser. Our Filters. Your Safety.

The laser protection filters consist of an absorbing plastic material without any additional, reflecting coating. The laser protection is based on the absorption of the laser beam within the material itself.

### P1P10

- Especially suitable for the dentistry sector
- For Nd:YAG at 1064nm and CO<sub>2</sub>-lasers at 10,600nm

### P1M03

- Suitable for dentistry and dermatology applications
- Especially for Nd:YAG and Er:YAG lasers

### P1L12

- Suitable for dentistry and dermatology applications
- Especially for alexandrite, diode and Nd:YAG lasers

## **More features. More functionality. Our Add-On's.**

Due to special developed adapters the F47 can be individually adjusted to your needs. The high wearing comfort of the F47 is always retained. Stable mounting of the adapters above the nose piece is easy, intuitive and allows additional options of third-party providers.

---

### **Add-on's at a glance:**

#### **Micro-LED**

- Recommended in combination with dark laser protection filters
- Light weight and individually adjustable

#### **Laser safe Magnifier**

- Sporty eyewear as magnifying glasses
- Magnifier from HEINE with 2.5x magnification
